

# Home-Based Lab Solutions

## Optimize Patient Care with Stat-Technologies' Comprehensive At-Home Testing Solutions

The HemaSpot device, provided through our partnership with BioQuintex Laboratories, offers patients a **virtually painless**, simple fingerstick method that **eliminates clinic visits** while ensuring **sample stability** and **accuracy**. With **industry-best sample handling** and results typically available within **24-48 hours**, Stat-Technologies stands out as the most reliable solution for **remote analytics**.

## End-to-End Analytics Support

Our **customizable**, white-labeled program – from our communications to testing kits – seamlessly integrate with **your brand**, offering a fully personalized solution that **enhances your patient care services** with robust analytics while maintaining your identity.

From **kit distribution** to **rapid results**, Stat-Technologies ensures a **patient-centric experience** in managing at-home testing. Unlike liquid blood-based testing, our dried blood microsampling technology offers **non-biohazardous**, **cost-efficient** benefits with highest patient compliance.

### 1. Kit Distribution

Kits are conveniently delivered to the user's home, with step-by-step instructions and 24/7 support for ease of use

### 2. Specimen Collection

Patients collect samples with HemaSpot, designed for precision and minimal invasiveness – it only takes three drops of blood

### 3. Return of Sample

Samples are mailed back using the provided prepaid label, requiring no special biohazard packaging and at ambient temperature

### 4. Rapid Results Access

Results are delivered from our microsampling-specialized laboratories typically within 24-48 hours

# Comprehensive Analytics Support Services

Stat-Technologies' best-in-class laboratory services, provided in collaboration with BioQuintex Laboratories, offer a wide range of **analytical panels**, including:

- A1C
- Lipid Panel
- Creatinine
- GGT
- TSH
- hsCRP
- & more

In addition to comprehensive testing, Stat-Technologies offers a **range of services**, from sample collection logistics, clinical, advanced diagnostic workflows, to digital solutions, that seamlessly integrate with your operations, making us the ideal partner for **supporting scalable telehealth platforms**.

## Contact Us

Contact us today to discover how some of the **world's leading brands trust Stat-Technologies** and how we can enhance your platform by providing reliable, scalable solutions that elevate patient care.

## HemaSpot Device + Stat-Technologies' Premier Laboratory Services

**Redefining home analytics support: delivering patient-focused convenience and precision in every test**

Stat-Technologies couples the HemaSpot – which offers unmatched blood collection ease, integrity, and reliability – with the nation's leading complex microsampling laboratory

### Blood Separation

HemaSpot **separates whole blood** at point of care into key components (red blood cells, cellular material, and serum)

### Clamshell Protection

The clamshell **shields samples** from external conditions and contaminants, **preserving sample integrity**

### Ambient Shipping

Samples shipped at **ambient temperature** with **no special shipping requirements** (liquid blood needs refrigeration, biohazard packaging for shipping)

### Highest Industry Reliability

**Industry's lowest sample failure rate** (<5%, with other devices as high as 30%), ensuring consistent, dependable results

### Extended Stability

Sample **stability for 30 days** (liquid blood must be tested nearly immediately)

### High Accuracy Testing

Up to **20 tests** from a sample of only **three drops of blood**, with up to **99% accuracy**
