

PRODUCT OVERVIEW:

RedDrop One is our patented, single-use lancet with integrated sharps injury prevention. FDA 510(k) cleared, it provides a painless, easy-to-use, and scalable solution for remote blood collection.

Built for seamless integration into digital health platforms and care programs, RedDrop One helps partners deliver high-quality diagnostics with greater convenience, improved compliance, and better patient experience.

-  Enables sample **collection at point-of-need**
-  Lowers **logistical and operational cost**
-  Improves **patient compliance**
-  User centric design enables **high reliability**

VALIDATED ANALYTES*

30+

number of measurable analytes per tube

ACTIVATION STEPS

1

Single activation step with one finger activation enhances ease of use

BLOOD VOLUME

400-600 μ L

Capillary blood volume collected within 3 minutes of activation

VIRTUALLY PAIN-FREE

< 1

Less than "1" on a pain scale of 0 to 9

USER EXPERIENCE

Category	RedDrop Average	Competitor Average
Comfort	8.32	7.78
Heat Pack	7.54	6.56
Actuator	8.36	4.10
Device Removal	7.32	6.10
Tube Removal	7.10	6.17
Overall Experience	8.58	6.24

(0 = worst possible score and 9 = best possible score)

"We have tested all of the capillary blood collection devices and we found that they are clumsy, not reliable and painful. The RedDrop Dx solution gives us more blood volume, better blood samples, and solves all of those problems."

-Chief Scientific Officer, Clinical Laboratory

TECHNICAL SPECIFICATIONS

Dimensions: 32mm x 32mm x 60mm

Weight: 42g
