Simple | Intuitive | Effective

Reimbursable systems for the Diagnosis of PAD

YOUR PATIENTS TRUST YOU

Undiagnosed PAD carries a 25% chance of heart attack, stroke, amputation, or death in 5 years!

HANDHELD SIMPLEABI SYSTEMS

Newman Medical's handheld simpleABI Systems offer superior ease of use in office settings. Pulse volume recording (PVR) is easier to use, user-independent, and provides comprehensive extremity blood flow assessment*. Portable, accurate, clinical-grade.

MAINTAIN THEIR TRUST

- Detect PAD before cardiovascular events occur
- 25% face MI, stroke, amputation or death within 5 years

MORE PAD PATIENTS THAN YOU REALIZE

- 20-30% of patients over 65 and diabetics/smokers over 50 have PAD
- Many mistake symptoms for arthritis or general leg pain
- Over half remain underdiagnosed

WE MAKE IT EASY

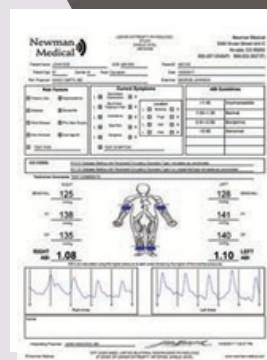

- Top customer feedback: "I can't believe it's so easy"
- On-screen test guidance
- Instant full-page results printing

YOU CAN CHANGE THESE OUTCOMES

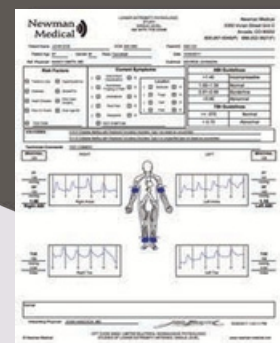

- More pharmaceutical options continue to come to market
- Effective, reimbursable exercise therapy
- Advanced intervention techniques with improved patient comfort

INTRODUCING THE STEADYDOP VASCULAR PROBE A GAME-CHANGER IN VASCULAR ASSESSMENT

Easy ABI Measurements, Even for Beginners:

The SteadyDop probe eliminates movement errors and angle guesswork, making accurate vascular assessments simple with your simpleABI system* – no prior Doppler experience necessary.

*The SteadyDop vascular probe is available as a separate accessory for use with simpleABI PAD testing systems and DigiDop Doppler units.
